SKILLS

Client-side development

- React
- TypeScript
- JavaScript
- CSS
- Git version control

Server-side development

- Node.js
- SQLite
- REST APIs

Tools

- Auth0
- GitHub
- React Query

Soft skills

- Active listening

SUMMARY

I'm Gurwinder Singh, a dynamic full-stack software developer with a lifelong passion for technology, sparked by my early fascination with classic cartridge video games. I recently honed my skills at Dev Academy Aotearoa, where I developed responsive and user-centered solutions using modern technologies like React and TypeScript.

My journey into tech is enriched by extensive experience as a Fibre Technician and Assistant Site Leader, where I cultivated exceptional communication, customer service, and teamwork skills. Known for my calm and respectful demeanor, I excel at fostering collaboration, creating a positive and productive environment.

I am excited to channel my technical expertise and creativity into solving complex challenges and contributing to the ever-evolving tech industry.

FINAL PROJECT: BITE-SHARE

- For my final project, I worked with a team of three to develop *Bite-Share*, a web application designed to fight hunger and reduce food wastage by connecting people with surplus food to those in need.
- As the Backend and Vibes Lead, I managed migration tables, seeded data, defined backend routes, and implemented database query functions. I also contributed to the frontend, ensuring seamless integration between the backend and user interface. Additionally, I facilitated daily stand-ups, scheduled breaks, and maintained a positive team atmosphere.
- This project strengthened my full-stack development skills and demonstrated the power of collaboration in addressing real-world issues.

- Problem Solving
- Effective communication

EDUCATION

12/2024

New Zealand Certificate in Applied Software Development (Level 6)

Dev Academy

Auckland, New Zealand

12/2015

Graduate Diploma in Management (Level 7)

NMIT

Nelson, New Zealand

04/2011

Bachelor of Science - Information Technology (Level 7)

Guru Nanak Dev University

Amritsar, India

ACTIVITIES

- I enjoy investing my free time in coding challenges, attending meetups, and working on personal projects.
- Beyond coding, I enjoy staying active through regular exercise and sports.
